Caring for Your Furniture

Avoid prolonged exposure to direct sunlight or placing plastic or rubber materials directly on the wood surfaces or leather desk tops. Avoid putting hot cups or dishes directly on the wood or leather. Nail polish remover, solvents or alcohol will damage the finish. Wipe up spills of any liquid immediately as they may otherwise mark the finish.

The beauty of Sligh wood furniture and leather top desks can be maintained by periodically using a self-cleaning furniture polish (like Pledge). Self-cleaning furniture polishes maintain luster and provide adequate cleaning under most circumstances.

Brass and other metals are protected with lacquer. Avoid using brass cleaner as it will damage the lacquer. Dust regularly, and for a more thorough cleaning use mild soap and water and dry thoroughly afterwards.

Clean leather executive desk chairs regularly with a dry cloth and vacuum the corners of the seat. Avoid using water, cleaning solvents, soaps or ammonia to clean the leather as it will harm the surface. Feel free to use a leather conditioner once or twice a year.

For fabric executive desk chairs, vacuum following a spill. If stained with oil or grease, clean with a cold rag and dish soap. Otherwise apply upholstery cleaner to the stain and follow the directions.
